

CA_1

1) EC2 instance

Server Name:

Keypair Name

Volume:

The screenshot shows the AWS Management Console 'Volumes' page. A green banner at the top indicates: 'Successfully attached volume vol-0b6b518c1a9fb22d9 to instance i-0b0baa910fa4dfd79.' Below this, a table lists three volumes:

	Name	Volume ID	Type	Size	IOPS	Throughput	Snapshot
<input type="checkbox"/>	-	vol-0b9e2e57e61fe1014	gp3	8 GiB	3000	125	snap-0e04d20...
<input type="checkbox"/>	-	vol-07de34380b6f3bc50	gp2	30 GiB	100	-	snap-0ca5dc...
<input type="checkbox"/>	-	vol-0b6b518c1a9fb22d9	gp2	10 GiB	100	-	-

Below the table is a 'Select a volume above' section. The left sidebar shows navigation options: Elastic Block Store (Volumes, Snapshots, Lifecycle Manager), Network & Security, Load Balancing, and CloudShell. The bottom status bar shows the date as 04-05-2023 and time as 14:35.

The screenshot shows the 'Attach volume' page in the AWS Management Console. The page title is 'Basic details'. It displays the following information:

- Volume ID: [vol-0b6b518c1a9fb22d9](#)
- Availability Zone: ap-south-1b
- Instance: [i-0b0baa910fa4dfd79](#) (with a refresh button)
- Device name: [/dev/sdf](#) (with a refresh button)

Below the instance dropdown, it states: 'Only instances in the same Availability Zone as the selected volume are displayed.' Below the device name dropdown, it states: 'Recommended device names for Linux: /dev/sda1 for root volume, /dev/sd[f-p] for data volumes.'

The left sidebar is the same as in the first screenshot. The bottom status bar shows the date as 04-05-2023 and time as 14:33.

Successfully attached volume `vol-0b6b518c1a9fb22d9` to instance `i-0b0baa910fa4dfd79`.

Firewall (security groups) Info

A security group is a set of firewall rules that control the traffic for your instance. Add rules to allow specific traffic to reach your instance.

☒ Create security group ☐ Select existing security group

We'll create a new security group called 'launch-wizard-18' with the following rules:

- ☒ Allow SSH traffic from
Helps you connect to your instance
Anywhere
0.0.0.0/0
- ☐ Allow HTTPS traffic from the internet
To set up an endpoint, for example when creating a web server
- ☐ Allow HTTP traffic from the internet
To set up an endpoint, for example when creating a web server

Rules with source of 0.0.0.0/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

Linux

The screenshot shows the AWS Management Console interface for the 'Application and OS Images (Amazon Machine Image)' page. The page title is 'Application and OS Images (Amazon Machine Image)'. Below the title, there's a search bar with the placeholder text 'Search our full catalog including 1000s of application and OS images'. The page is divided into two tabs: 'Recents' and 'Quick Start'. Under the 'Quick Start' tab, there's a grid of AMIs including Amazon Linux, macOS, Ubuntu, Windows, Red Hat, and SUSE. Below the grid, there's a section for 'Amazon Linux 2023 AMI'.

The second screenshot shows the 'Instances (5)' page in the AWS Management Console. The page displays a table of EC2 instances with columns for Name, Instance ID, Instance state, Instance type, Status check, Alarm status, and Actions. The table contains five instances: Myinsta1 (Terminated), ec2usecase2 (Running), ec2usecase2 (Terminated), ec2usecase1 (Running), and ec2usecase1 (Running). Below the table, there's a section for 'Select an instance'.

Name	Instance ID	Instance state	Instance type	Status check	Alarm status	Actions
Myinsta1	i-0ab46967f5981aa47	Terminated	t2.micro	-	No alarms	+
ec2usecase2	i-0b0baa910fa4dfd79	Running	t2.micro	Initializing	No alarms	+
ec2usecase2	i-0ef752d38583f1386	Terminated	t2.micro	-	No alarms	+
ec2usecase1	i-0d4afbb9a08403dc4	Running	t2.micro	Initializing	No alarms	+

▼ Key pair (login) Info

You can use a key pair to securely connect to your instance. Ensure that you have access to the selected key pair before you launch the instance.

Key pair name - required

ec2usecase1 Create new key pair

For Windows instances, you use a key pair to decrypt the administrator password. You then use the decrypted password to connect to your instance.

3) IAM group and user-

This screenshot shows the 'Create user group' page in the AWS IAM console. The left sidebar contains the 'Identity and Access Management (IAM)' menu with options like Dashboard, Access management, User groups, Users, Roles, Policies, Identity providers, and Account settings. The main content area is titled 'Create user group' and includes a 'Name the group' section with a text input field containing 'EC2-Admins'. Below this is an 'Add users to the group - Optional' section with a note that an IAM user is an entity created in AWS to represent a person or application that uses it to interact with AWS, and a button to refresh the user list. The bottom of the page shows the AWS footer with copyright information and links to Privacy, Terms, and Cookie preferences.

This screenshot shows the 'Attach permissions policies' page in the AWS IAM console. The left sidebar is the same as the previous screenshot. The main content area is titled 'Attach permissions policies - Optional' and includes a search bar for filtering policies. Below the search bar, a table lists available policies. The table has columns for 'Policy name', 'Type', and 'Description'. The policy 'AmazonEC2FullAccess' is selected, and its description 'Provides full access to Ama' is visible. At the bottom of the page, there are 'Cancel' and 'Create group' buttons. The bottom of the page shows the AWS footer with copyright information and links to Privacy, Terms, and Cookie preferences.
